Net income	28.2	18.7	+50.8

Consolidated financial highlights (IFRS results)
Revenues for the three months under review were ¥147.4 billion (an increase of 17.5% year on year), operating profit for the three months under review was ¥38.4 billion (an increase of 46.0% year on year), and net income for the three months under review was ¥28.2 billion (an increase of 50.8% year on year). These results include non-Core items, such as amortization of intangible assets of ¥0.4 billion and impairment loss of intangible assets of ¥4.1 billion, which are excluded from the Core results that Chugai adopts to manage recurring business activities.

Consolidated financial highlights (Core results)
Revenues for the three months under review were ¥147.4 billion (an increase of 17.5% year on year), due to increases in sales and royalties and other operating income.

Of revenues, sales excluding Tamiflu were ¥116.3 billion (an increase of 5.0% year on year), mainly due to increases in Actemra and other exports to Roche. Royalties and other operating income amounted to ¥22.7 billion (an increase of 211.0% year on year), due to an increase of one-time income and others resulting from the transfer of long-term listed products to Taiyo Pharma Co., Ltd, etc.

Cost to sales ratio was 50.9%, a 0.7 percentage point improvement year on year, due to the effect of exchange rates, etc. As a result, gross profit amounted to ¥83.9 billion (an increase of 29.9% year on year).

Operating expenses were ¥41.1 billion (an increase of 8.4% year on year). Marketing and distribution expenses were ¥15.9 billion (an increase of 3.2% year on year) due to the effect of exchange rates, etc., research and development expenses amounted to ¥20.9 billion (an increase of 8.9% year on year) due to the progress of projects, and general and administration expenses amounted to ¥4.3 billion (an increase of 30.3% year on year) due to an increase in various expenses including the enterprise tax (pro forma standard taxation). As a result, Core operating profit was ¥42.8 billion(an increase of 60.3% year on year) and Core net income was ¥31.2 billion (an increase of 65.1% year on year).

Note: Core results
Chugai discloses its results on a Core basis from 2013 in conjunction with its transition to IFRS. Core results are the results after adjusting non-recurring items recognized by Chugai to IFRS results, and are consistent with the Core concept disclosed by Roche. Core results are used by Chugai as an internal performance indicator, for explaining the status of recurring profits both internally and externally, and as the basis for payment-by-results.

For further details regarding the adjustment to IFRS results, please refer to the Supplementary Materials on page 5, entitled "Reconciliation of IFRS results to Core results."

Sales breakdown in billions of yen

	First three months of FY 2018.12 (Jan. 1, 2018–Mar. 31, 2018)	First three months of FY 2017.12 (Jan. 1, 2017–Mar. 31, 2017)	% change
Sales	**124.7**	**118.1**	**+5.6**
Domestic sales (excluding Tamiflu)	**84.5**	**85.1**	**(0.7)**
Oncology	48.6	49.3	(1.4)
Bone and joint diseases	21.6	20.4	+5.9
Renal diseases	8.0	8.3	(3.6)
Others	6.2	7.1	(12.7)
Tamiflu sales	**8.4**	**7.4**	**+13.5**
Ordinary use	8.3	6.1	+36.1
Government stockpiles	0.1	1.3	(92.3)
Overseas sales	**31.9**	**25.6**	**+24.6**

Domestic sales (excluding Tamiflu)
Domestic sales excluding Tamiflu were ¥84.5 billion (a decrease of 0.7% year on year) due to a decrease in sales of some products, despite steady growth of Alecensa (an ALK inhibitor, anti-cancer agent), as well as mainstay products in the bone and joint diseases area.

Oncology products sales were ¥48.6 billion (a decrease of 1.4% year on year). This decrease was due to a decrease in sales of Herceptin (an anti-HER2 humanized monoclonal antibody, anti-cancer agent) and Rituxan (an anti-CD20 monoclonal antibody, anti-cancer agent), despite favorable performance of Alecensa (an ALK inhibitor, anti-cancer agent) and Perjeta (an HER2 dimerization inhibitory humanized monoclonal antibody, anti-cancer agent).

Bone and joint diseases products sales were ¥21.6 billion (an increase of 5.9% year on year). This was due to the robust sales of mainstay products such as Actemra (a humanized anti-IL-6 receptor monoclonal antibody), Edirol (an oral therapeutic agent for osteoporosis), and Bonviva (a bisphosphonate for osteoporosis).

Renal diseases products sales amounted to ¥8.0 billion (a decrease of 3.6% year on year) due to a decline in sales of some products, despite maintenance in sales of Oxarol (an agent for secondary hyperparathyroidism) and Mircera (a long-acting erythropoiesis-stimulating agent) at the same level as the previous year.

Others products sales were ¥6.2 billion (a decrease of 12.7% year on year) due to a decrease in sales of Rohypnol, whose marketing authorization was transferred in the previous year and others.

Tamiflu sales
Sales of Tamiflu (an anti-influenza agent) for ordinary use were ¥8.3 billion (an increase of 36.1% year on year), while sales to government stockpiles etc. were ¥0.1 billion (a decrease of 92.3% year on year).

Overseas sales
Overseas sales amounted to ¥31.9 billion (an increase of 24.6% year on year) due mainly to increases in exports of Actemra and Hemlibra to Roche.

(2) Consolidated financial position

Assets, liabilities, and net assets in billions of yen

	March 31, 2018	December 31, 2017	% change
Movements of assets and liabilities			
Net working capital	231.8	250.7	(7.5)
Long-term net operating assets	205.7	189.5	+8.5
Net operating assets (NOA)	**437.5**	**440.2**	**(0.6)**
Net cash	266.3	242.8	+9.7
Other non-operating assets – net	7.6	9.9	(23.2)
Total net assets	**711.3**	**692.9**	**+2.7**
Consolidated balance sheet (IFRS basis)			
Total assets	852.9	852.5	+0.0
Total liabilities	(141.5)	(159.6)	(11.3)
Total net assets	711.3	692.9	+2.7

Net working capital at March 31, 2018 was ¥231.8 billion (a decrease of ¥18.9 billion since December 31, 2017). This was because the sum of the decrease in accounts receivable-trade and the increase in accounts payable-trade outweighed the sum of the decrease in accounts payable-other. Long-term net operating assets increased by ¥16.2 billion since the end of the previous fiscal year to ¥205.7 billion, due mainly to an increase in property, plant and equipment. As a result, net operating assets (NOA) were ¥437.5 billion, a decrease of ¥2.7 billion from the end of the previous fiscal year.

As the table entitled "Cash flows" on the next page indicates, net cash, including marketable securities and interest-bearing debt, increased by ¥23.5 billion since December 31, 2017 to ¥266.3 billion. Other non-operating assets - net decreased by ¥2.3 billion from the end of the previous fiscal year to ¥7.6 billion, due mainly to a decrease in investment securities.

With the application of IFRS 15 'Revenue from Contracts with Customers,' deferred income of ¥10.6 billion after tax effect, which was included in net working capital and long-term net operating assets at the beginning of the year, has been presented as retained earnings.

As a consequence, total net assets were ¥711.3 billion (an increase of ¥18.4 billion since December 31, 2017).

Note: Movements of assets and liabilities
The consolidated balance sheet has been prepared in accordance with International Accounting Standards (IAS) No. 1, "Presentation of Financial Statements." On the other hand, "Movements of assets and liabilities" including net operating assets (NOA) are a reconfiguration of the consolidated balance sheet as internal indicators and are identical to the indicators disclosed by Roche. Furthermore, no items from the assets and liabilities have been excluded, as the Core results concept only applies to the income statement.

For further details, please refer to the Supplementary Materials on page 8, entitled "Movements of assets and liabilities."

Note: Net operating assets (NOA)
Net operating assets allow for an assessment of the Group's operating performance of the business independently from financing and tax activities. Net operating assets are calculated as net working capital, long-term net operating assets that includes property, plant and equipment, intangible assets etc. minus provisions.

Cash flows in billions of yen

	First three months of FY 2018.12 (Jan. 1, 2018–Mar. 31, 2018)	First three months of FY 2017.12 (Jan. 1, 2017–Mar. 31, 2017)	% change
Movements of free cash flows			
Operating profit - IFRS basis	38.4	26.3	+46.0
Operating profit, net of operating cash adjustments	47.1	30.8	+52.9
Operating free cash flows	56.3	33.6	+67.6
Free cash flows	42.3	21.4	+97.7
Net change in net cash	23.5	6.5	+261.5
Consolidated statement of cash flows (IFRS basis)			
Cash flows from operating activities	50.8	30.7	+65.5
Cash flows from investing activities	(18.5)	(7.8)	+137.2
Cash flows from financing activities	(17.8)	(14.2)	+25.4
Net change in cash and cash equivalents	13.7	8.3	+65.1
Cash and cash equivalents at March 31	152.8	103.7	+47.3

Operating profit, net of operating cash adjustments, amounted to ¥47.1 billion. This is calculated by adjusting for depreciation and other items that are included in operating profit but are not accompanied by cash inflows or outflows and all inflows and outflows related to NOA that are not accompanied by profit and loss. The principal items influencing this result were a total of ¥4.1 billion in impairment loss of intangible assets.

Operating free cash flows, which are calculated by adding a decrease in net working capital of ¥20.5 billion and also subtracting expenditures of ¥11.3 billion for the purchase of property, plant and equipment and intangible assets from operating profit, net of operating cash adjustments, amounted to a net inflow of ¥56.3 billion. Factors accounting for the decrease in net working capital are as shown on the previous page in the table entitled "Assets, liabilities, and net assets." Purchases of property, plant and equipment were mainly expenditures for purchase of buildings and equipment of the laboratories and plants.

Free cash flows were a net cash inflow of ¥42.3 billion. This is calculated by subtracting a total of ¥14.0 billion of non-operating cash outflows from financial asset management, settlement for transfer pricing taxation and income taxes paid from operating free cash flows.

The net change in net cash, after dividends paid and foreign currency translation adjustments, was an increase of ¥23.5 billion in comparison with the end of the previous fiscal year. The net change in cash and cash equivalents, excluding changes in marketable securities and interest-bearing debt, was a net cash inflow of ¥13.7 billion. The cash and cash equivalents balance at the end of the first quarter amounted to ¥152.8 billion.

Note: Movements of free cash flows (FCF)
The consolidated statement of cash flows has been prepared in accordance with International Accounting Standard (IAS) No. 7, "Statement of Cash Flows." FCF is a reconfiguration of the consolidated statement of cash flows as internal indicators and is identical to the indicators disclosed by Roche. Furthermore, no items from FCF have been excluded, as the Core results concept only applies to the income statement.

For further details, please refer to the Supplementary Materials on page 9, entitled "Movements of free cash flows."

(3) Forecast for consolidated performance
Chugai has not made any changes in its forecast of consolidated results for the fiscal year ending December 31, 2018 since the announcement regarding the forecast issued on February 1, 2018.

Note: In "1. Qualitative Information," amounts less than ¥0.1 billion have been rounded to the nearest ¥0.1 billion. Figures for changes in amounts and percentages have been calculated using data denominated in ¥0.1 billion units.

(6) Notes regarding the interim condensed consolidated financial statements

1) General accounting principles and significant accounting policies

a. Basis of preparation of the consolidated financial statements

These financial statements are the interim condensed consolidated financial statements ("Interim Financial Statements") of Chugai, a company registered in Japan, and its subsidiaries ("the Group"). The common stock of Chugai is publicly traded and listed on the Tokyo Stock Exchange under the stock code "TSE: 4519." The Interim Financial Statements were approved by the Board of Directors on April 24, 2018.

Roche Holding Ltd. is a public company registered in Switzerland and the parent company of the Roche Group, which discloses its results in accordance with IFRS. The shareholding percentage of Roche Holding Ltd. in Chugai is 59.89% (61.29% of the total number of shares issued excluding treasury stock). The Group became principal members of the Roche Group after entering into a strategic alliance in October 2002.

The Group meets all of the requirements for a "Specified Company under Designated International Financial Reporting Standards" as stipulated under Article 1-2 of the "Ordinance on Terminology, Forms, and Preparation Methods of Quarterly Consolidated Financial Statements" (Japanese Cabinet Ordinance No. 64, 2007). Hence, in accordance with Article 93 of the same Ordinance, the Interim Financial Statements have been prepared in accordance with International Accounting Standard (IAS) No. 34 "Interim Financial Reporting."

The Interim Financial Statements should be used with the consolidated financial statements for the year ended December 31, 2017 as they do not include all the information as required for the consolidated financial statements for the full fiscal year.

The Interim Financial Statements are presented in Japanese yen, which is Chugai's functional currency and amounts are rounded to the nearest ¥1 million. They have been prepared using the historical cost convention except for items that are required to be accounted for at fair value.

b. Key accounting judgments, estimates and assumptions

The preparation of the Interim Financial Statements requires management to make judgments, estimates, and assumptions that affect the reported amounts of revenues, expenses, assets, liabilities, and contingent amounts. Actual outcomes could differ from those management estimates. The estimates and underlying assumptions are reviewed on an on-going basis and are based on historical experience and various other factors. Revisions to estimates are recognized in the period in which the estimate is revised.

The information for judgment, estimates, and assumptions that have a material impact on the amount recognized in the Interim Financial Statements of the Group is principally the same for the prior fiscal year.

c. Significant accounting policies

The Group applies the same significant accounting policies that are used for the previous fiscal year to the Interim Financial Statements, except for those stated in d. Changes in accounting policies below.

d. Changes in accounting policies

In 2018 the Group implemented the following new standards, including any consequential amendments to other standards, with a date of initial application of 1 January 2018.

- IFRS 9 'Financial Instruments'
- IFRS 15 'Revenue from Contracts with Customers'

The nature and the effects of the changes most relevant to the Group's Interim Financial Statements are given below.

IFRS 9 'Financial Instruments'

Effective 1 January 2018 the Group has implemented IFRS 9 'Financial Instruments'. The new standard replaces IAS 39 'Financial Instruments: Recognition and Measurement'. The standard deals with the classification, recognition and measurement (including impairment) of financial instruments and also introduces a new hedge accounting model.

There is no material impact on the Group's performance or financial position from the application of this standard.

Classification and measurement of financial instruments.

Items such as equity securities and debt securities which were previously classified as available-for-sale under IAS 39, with the exception of time accounts over three months, are classified as financial assets at fair value through other comprehensive income (OCI), and time accounts over three months as amortised cost. Though the Group takes advantage of the exemption allowing it not to restate comparative information for prior periods with respect to classification and measurement changes, since there were no changes in the carrying amounts, no adjustments were made to retained earnings as of January 1, 2018.

Changes in the fair value of equity instruments designated as financial assets at fair value through other comprehensive income are recognized in other comprehensive income, and the cumulative amount of other comprehensive income is transferred to retained earnings when the instruments are derecognized.

Impairment of financial assets.

On 1 January 2018 the Group changed the methodology of assessing impairment of its financial assets from the incurred loss model (used in IAS 39) to the expected credit loss model (used in IFRS 9). In accordance with the transitional provisions of IFRS 9, the Group has not restated prior periods but it has reassessed the impairment allowances under the new approach as of 1 January 2018. As the impact of the transition was immaterial, the Group has recognized it as profit and loss for the fiscal year.

Hedge accounting.

As the Group may continue to apply the hedge accounting requirements of IAS 39 instead of those in IFRS 9 at the initial application of IFRS 9, the Group has chosen to continue to apply the hedge accounting requirements of IAS 39.

IFRS 15 'Revenue from Contracts with Customers'

Effective 1 January 2018 the Group has implemented IFRS 15 'Revenue from contracts with customers'. The new standard replaces IAS 18 'Revenue' and IAS 11 'Construction Contracts'. IFRS 15 establishes a comprehensive framework for determining whether, how much and when revenue is recognised, and also contains new requirements related to presentation. The core principle in that framework is that revenue should be recognised dependent on the transfer of promised goods or services to the customer for an amount that reflects the consideration which should be received in exchange for those goods or services. The objective of the standard is to provide a five-step approach to revenue recognition that includes identifying contracts with customers, identifying performance obligations, determining transaction prices, allocating transaction prices to performance obligations, and recognising revenue when or as performance obligations are satisfied. Judgement will need to be applied, including making estimates and assumptions, for multiple-element contracts in identifying performance obligations, in constraining estimates of variable consideration and in allocating the transaction price to each performance obligation. The new standard results in an increased volume of disclosure information in the Annual Financial Statements.

Changes introduced by the standard relevant to the Group.

The new standard provides new requirements and additional guidance that are relevant to the Group, notably on the following areas:

- Revenues from licenses of intellectual property, including sales-based royalties, on constraining estimates of variable consideration such as e.g. development milestones that may be regarded as a separate performance obligation involving variable consideration. There is no material impact from these changes.
- The new standard also clarifies how to allocate sales, including the treatment of discounts, to each element in multiple-elements contracts and when to recognise sales for each of those elements. It requires the use of estimates and assumptions and some judgement to apply this guidance in practice. There is no material impact from this guidance.
- Out-licensing contracts may be entered into with no further obligation or may include commitments to research, late-stage development, regulatory approval, co-marketing or manufacturing. These may be settled by a combination of up-front payments, milestone payments, and reimbursements for services provided. Whether to consider these commitments as a single performance obligation or separate ones, or even being in scope of IFRS 15, is not straight-forward and requires some judgement. Depending on the conclusion, this may result in all revenue being calculated at inception and either being recognised at once or spread over the term of a longer performance obligation. With the application of this standard, upfront payment received, which was formerly recognized over time as deferred income, is recognized as one-time income on out-licensing.

Transition approach.

The Group recognizes the cumulative effect of applying the new standard at the date of initial application, with no restatement of the comparative periods presented. It records the cumulative effect, the amount of ¥10,606 million after tax effect, as an adjustment to the opening balance of retained earnings at the date of initial application. Except for this adjustment, there is no material impact on the Group's performance or financial position from the application of this standard.
