These results include non-Core items, such as amortization of intangible assets of ¥0.6 billion and impairment loss of intangible assets of ¥2.5 billion, which are excluded from the Core results that Chugai adopts to manage recurring business activities.

#### **Consolidated financial highlights (Core results)**

Revenues for the six months under review were ¥252.8 billion (an increase of 2.1% year on year), due to an increase in royalties and other operating income.

Of revenues, sales excluding Tamiflu were ¥228.7 billion (a decrease of 0.6% year on year), due to the impact of the NHI drug price revisions and a decrease in Actemra exports to Roche, despite the sales growth in the bone and joint diseases area and an increase in Alecensa exports to Roche. Royalties and other operating income amounted to ¥15.9 billion (an increase of 54.4% year on year), due to an increase of one-time income such as milestone income.

Cost to sales ratio was 51.0%, a 1.4 percentage point improvement year on year, due to a change in the product mix etc. As a result, gross profit amounted to ¥131.9 billion (an increase of 7.1% year on year).

Expenditures were \$81.8 billion (an increase of 3.5% year on year). Marketing and distribution expenses were \$32.2 billion (a decrease of 2.7% year on year) due to the reclassification of some expenses due to organizational changes, etc. On the other hand, research and development expenses were \$42.4 billion (an increase of 5.7% year on year), due primarily to the progress of projects and reclassification of some expenses due to organizational changes, etc., and general and administration expenses amounted to \$7.2 billion (an increase of 24.1% year on year), due to an increase in various expenses including the enterprise tax (pro forma standard taxation).

As a result, Core operating profit was ¥50.2 billion (an increase of 13.8% year on year).

Other expense represents settlement for transfer pricing taxation to Roche, under which  $\pm 0.4$  billion was recorded in the six months under review, including the deduction associated with the estimated amount recorded in the previous fiscal year.

As a result, Core net income was ¥38.8 billion (an increase of 19.8% year on year).

#### **Note: Core results**

Core results are the results after adjusting non-recurring items recognized by Chugai to IFRS results, and are consistent with the Core concept disclosed by Roche. Core results are used by Chugai as an internal performance indicator, for explaining the status of recurring profits both internally and externally, and as the basis for payment-by-results.

For further details regarding the adjustment to IFRS results, please refer to the Supplementary Materials on page 5, entitled "Reconciliation of IFRS results to Core results."

Oncology products sales were ¥106.3 billion (a decrease of 0.7% year on year). This decrease was due to a decrease in sales of mainstay products such as Avastin (an anti-VEGF humanized monoclonal antibody, anti-cancer agent), which became subjected to special market-expansion re-pricing in April last year, despite the steady growth in sales of Alecensa (an ALK inhibitor, anti-cancer agent) which was launched in 2014.

Bone and joint diseases products sales were ¥43.7 billion (an increase of 5.3% year on year), due to the robust sales of mainstay products such as Edirol, a top brand in the domestic market of oral therapeutic agents for osteoporosis, Actemra (a humanized anti-IL-6 receptor monoclonal antibody) and Bonviva (a bisphosphonate for osteoporosis).

Renal diseases products sales amounted to ¥18.4 billion (a decrease of 7.5% year on year), due to a decline in sales of Oxarol (an agent for secondary hyperparathyroidism) and Mircera (a long-acting erythropoiesis-stimulating agent), as a result of the NHI drug price revisions in April last year.

#### Tamiflu sales

Sales of Tamiflu (an anti-influenza agent) for ordinary use were ¥6.3 billion (a decrease of 13.7% year on year), while sales to government stockpiles etc. were ¥1.9 billion.

#### **Overseas sales**

Overseas sales amounted to ¥45.7 billion (a decrease of 0.2% year on year), due to a decrease in exports of Actemra mainly impacted by foreign exchange rate fluctuations, despite the increases in exports to Roche of Alecensa,

#### Note: Domestic sales (excluding Tamiflu)

Independently disclosed sales of transplant, immunology and infectious diseases area up until FY 2016 were included and disclosed in sales of others area from the first quarter in FY 2017.

## (2) Consolidated financial position

Assets, liabilities, and net assets in billions of yen

	June 30, 2017	December 31, 2016	% change
Movements of assets and liabilities			
Net working capital	247.0	258.5	(4.4)
Long-term net operating assets	188.1	172.7	+8.9
Net operating assets (NOA)	435.0	431.1	+0.9
Net cash	220.5	204.9	+7.6
Other non-operating assets - net	12.6	10.5	+20.0
Total net assets	668.2	646.5	+3.4
Total net assets			
Consolidated balance sheet (IFRS basis) Total assets	821.7	806.3	+1.9
Total liabilities	(153.5)	(159.8)	(3.9)
Total net assets	668.2	646.5	+3.4

Net working capital at June 30, 2017 was \$247.0 billion (a decrease of \$11.5 billion since December 31, 2016). This was because the sum of the decrease in accounts receivable-trade and accounts receivable-other outweighed the increase in inventories. Longterm net operating assets increased by \$15.4 billion since the end of the previous fiscal year to \$188.1 billion, due mainly to an increase in property, plant and equipment. As a result, net operating assets (NOA) were \$435.0 billion, an increase of \$3.9 billion from the end of the previous fiscal year.

As the table entitled "Cash flows" on the next page indicates, net cash, including marketable securities and interest-bearing debt, increased by \$15.6 billion since December 31, 2016 to \$220.5 billion. Other non-operating assets - net increased by \$2.1 billion from the end of the previous fiscal year to \$12.6 billion, due mainly to a decrease in current income tax liabilities as a result of tax payment.

As a consequence, total net assets were ¥668.2 billion (an increase of ¥21.7 billion since December 31, 2016).

## Note: Movements of assets and liabilities

The consolidated balance sheet has been prepared in accordance with International Accounting Standards (IAS) No. 1, "Presentation of Financial Statements." On the other hand, "Movements of assets and liabilities" including net operating assets (NOA) are a reconfiguration of the consolidated balance sheet as internal indicators and are identical to the indicators disclosed by Roche. Furthermore, no items from the assets and liabilities have been excluded, as the Core results concept only applies to the income statement.

For further details, please refer to the Supplementary Materials on page 8, entitled "Movements of assets and liabilities."

#### Note: Net operating assets (NOA)

Net operating assets allow for an assessment of the Group's operating performance of the business independently from financing and tax activities. Net operating assets are calculated as net working capital, long-term net operating assets that includes property, plant and equipment, intangible assets etc. minus provisions.

Net change in cash and cash equivalents	15.3	(1.6)	_	
Cash and cash equivalents at June 30	110.7	100.1	+10.6	

Operating profit, net of operating cash adjustments, amounted to \$56.9 billion. This is calculated by adjusting for depreciation and other items that are included in operating profit but are not accompanied by cash inflows or outflows and all inflows and outflows related to NOA that are not accompanied by profit and loss. The principal items influencing this result were a total of \$7.2 billion in depreciation of property, plant and equipment.

Operating free cash flows, which are calculated by adding a decrease in net working capital of \$11.6 billion and subtracting expenditures of \$24.7 billion for the purchase of property, plant and equipment and intangible assets from operating profit, net of operating cash adjustments, amounted to a net inflow of \$43.8 billion. Factors accounting for the decrease in net working capital are as shown on the previous page in the table entitled "Assets, liabilities, and net assets." Purchases of property, plant and equipment were mainly expenditures for purchase of buildings and equipment of the laboratories and plants.

Free cash flows were a net cash inflow of \$28.3 billion. This is calculated by subtracting a total of \$15.5 billion of non-operating cash outflows from financial asset management, settlement for transfer pricing taxation and income taxes paid from operating free cash flows.

As a result, the net change in net cash, after dividends paid and foreign currency translation adjustments, was an increase of \$15.6 billion in comparison with the end of the previous fiscal year. The net change in cash and cash equivalents, excluding changes in marketable securities and interest-bearing debt, was a net cash inflow of \$15.3 billion. The cash and cash equivalents balance at the end of the second quarter amounted to \$110.7 billion.

#### Note: Movements of free cash flows (FCF)

The consolidated statement of cash flows has been prepared in accordance with International Accounting Standard (IAS) No. 7, "Statement of Cash Flows." FCF is a reconfiguration of the consolidated statement of cash flows as internal indicators and is identical to the indicators disclosed by Roche. Furthermore, no items from FCF have been excluded, as the Core results concept only applies to the income statement.

For further details, please refer to the Supplementary Materials on page 9, entitled "Movements of free cash flows."

## General accounting principles and significant accounting policies

## (a) Basis of preparation of the consolidated financial statements

These financial statements are the interim condensed consolidated financial statements ("Interim Financial Statements") of Chugai, a company registered in Japan, and its subsidiaries ("the Group"). The common stock of Chugai is publicly traded and listed on the Tokyo Stock Exchange under the stock code "TSE: 4519." The Interim Financial Statements were approved by the Board of Directors on July 27, 2017.

Roche Holding Ltd. is a public company registered in Switzerland and the parent company of the Roche Group, which discloses its results in accordance with IFRS. The shareholding percentage of Roche Holding Ltd. in Chugai is 59.89% (61.32% of the total number of shares issued excluding treasury stock). The Group became principal members of the Roche Group after entering into a strategic alliance in October 2002.

The Group meets all of the requirements for a "Specified Company under Designated International Financial Reporting Standards" as stipulated under Article 1-2 of the "Regulations Concerning Terminology, Forms, and Preparation Methods of Consolidated Financial Statements" (Ministry of Finance of Japan Regulation No. 28, 1976). Hence, in accordance with Article 93 of the "Ordinance on Terminology, Forms, and Preparation Methods of Quarterly Consolidated Financial Statements" (Japanese Cabinet Ordinance No. 64, 2007), the Interim Financial Statements have been prepared in accordance with International Accounting Standard (IAS) No. 34 "Interim Financial Reporting."

The Interim Financial Statements should be used with the consolidated financial statements for the year ended December 31, 2016 as they do not include all the information as required for the consolidated financial statements for the full fiscal year.

The Interim Financial Statements are presented in Japanese yen, which is Chugai's functional currency and amounts are rounded to the nearest ¥1 million. They have been prepared using the historical cost convention except for items that are required to be accounted for at fair value.

## (b) Key accounting judgments, estimates and assumptions

The preparation of the Interim Financial Statements requires management to make judgments, estimates, and assumptions that affect the reported amounts of revenues, expenses, assets, liabilities, and contingent amounts. Actual outcomes could differ from those management estimates. The estimates and underlying assumptions are reviewed on an on-going basis and are based on historical experience and various other factors. Revisions to estimates are recognized in the period in which the estimate is revised.

The information for judgment, estimates, and assumptions that have a material impact on the amount recognized in the Interim Financial Statements of the Group is principally the same for the prior fiscal year.

## (c) Significant accounting policies

The Group applies the same significant accounting policies that are used for the prior fiscal year's consolidated financial statements to the Interim Financial Statements.
