### Movements of assets and liabilities

The consolidated balance sheet has been prepared in accordance with IAS 1, "Presentation of Financial Statements". On the other hand, "Movement of assets and liabilities" including net operating assets (NOA) are an independent reconfiguration of the consolidated balance sheet and are consistent with the NOA concepts disclosed by Roche. Furthermore, no items from the assets and liabilities of IFRS have been excluded, as the Core results concept only applies to the income statement.

The above table and the page that follows present details of trends in cash flows including FCF, as well as trends in assets and liabilities including NOA. The features of FCF and NOA are outlined as FCF reflects the ability to generate net cash from a management perspective after meeting the Company's obligations to interest-bearing debt providers and shareholders.

Operating FCF includes adjustments for changes in working capital and cash flows before tax after deducting operating investments for tangible and intangible assets after recording the ability to generate cash by operating activities as operating cash flow after adjustment.

The concepts of operating profit, operating FCF and NOA and mutually consistent.

Other adjustments to operating profit: adjustments for all non-cash income and expense items other than amortization expenses and impairment included in operating profit (such as loss on inventory differences, reserve for doubtful accounts, stock option expenses, loss on asset retirement, and increase/decrease in reserves) as well as all non-operating income and expense cash flows relating to net operating assets (NOA) (including proceeds from the sales of assets and reserve payments).

Increases and decreases in marketable securities and interest-bearing debt are included in net increases and decreases in net cash.

### The movement of free cash flows(FCF)

The consolidated statement of cash flows has been prepared in accordance with IAS 7, "Statement of Cash Flows". On the other hand, the Company prepares operating Free Cash Flow (FCF) for use as an internal management metric. This metric provides a defined mechanism that is a cohesive and consistent basis across operating profit, operating FCF, and NOA. In addition, this metric is also aligned to the FCF disclosed by Roche. FCF represents the IFRS consolidated statement of cash flows that has been reconfigured on different presentation basis with no eliminations such as the Core results.
