### Chugai Renews its “Story of Biotechnology” Website

Enhanced accessibility and usability give a deep understanding about Biotechnology

October 11, 2013 (Tokyo) - Chugai Pharmaceutical Co., Ltd. (hereafter, "Chugai") [Head Office: Chuo-ku, Tokyo; Chairman & CEO: Osamu Nagayama] announced today the renewal of "*Bio no Hanashi* (Story of Biotechnology)," featured in "Illnesses and Drugs," one of web contents in Chugai website for general public.

"Story of Biotechnology" is composed of two topics, "Easy Learning of Biotechnology and Genomes" and "Easy Learning of Antibody Drugs," each offered in easily-understood terms. This information provision site was established with the aim of having people of broad-ranging age groups, from children to adults, gain a deeper understanding of biotechnology that makes the actions of an organism useful in people's daily lives, as well as antibody drugs that were developed by using such technology.

The newly updated "Story of Biotechnology" features the following updates with enhanced accessibility and usability:

- (1) Improved menus to enable faster and easier searches of target information
- (2) Realization of video replays in multiple devices such as smartphones and tablet terminals
- (3) Introduction of medical treatment with use of iPS cells
- (4) Introduction of Chugai's innovative next-generation antibody technologies

The content was produced under the editorial supervision of Dr. Izumi Kumagai, Professor Emeritus and Guest Professor of bioengineering at Tohoku University Graduate School of Engineering.
